

# Speaking Parts for Dino – Soaring

Color Code: Gibson Morgenlaender Bessett

## Student 1

Let's go on a dino dig, and travel back in time, to meet amazing dinosaurs in music and in rhyme.

## Student 2

We're going to feature creatures that run and leap and bound. Listen and you'll find some make the scariest sounds around!

## Student 3

We hope that you're all ready, and we hope that you're all set, to have an adventure that you never will forget!

**\*\* SING RIP-ROARING DINOSAURS \*\***

## Student 4

Can you picture a dinosaur eighty-eight feet long, and one that weighed in at twelve tons strong?

## Student 5

It had a very small head and a very small brain, and Diplodocus was this dinosaur's name.

**\*\* SING DIPLODICUS \*\***

## Student 6

Next come some speedy little dinos that walked on two feet, with sharp curved teeth to bit and help them chew their meat.

## Student 7

Though only four feet high, they had powerful claws. Velciraaptor was the name of these ferocious dinosaurs!

**\*\* SING VELCIRAPTOR \*\***

## Student 8

Our next dinosaurs had crests on their heads with lots of tubes inside. The tubes made loud trumpet sounds, heard both far and wide.

### Student 9

“Parasaurolophus” is quite a mouthful to say. Now, let’s go back in time to meet these dinosaurs today.

**\*\* SING PARASAUROLOPHUS \*\***

### Student 10

Tyrannosaurus Rex, oh, what a scary sight! Just the name alone could make you shiver with fright!

### Student 11

They’d chew 500 pounds with just one bite – it’s true! And their teeth were as sharp as the sharpest razors too!

### Student 12

As carnivores, eating meat was really their thing. They truly earned their name as the “Tyrant Lizard King”!

**\*\* SING TYRANNOSAURUS \*\***

### Student 13

Triceratops had a horn on its nose and two more above its eyes. They measured in at ten feet tall and thirty feet lengthwise.

### Student 14

With parrot-like beaks and claws on their legs, these amazing dinos were hatched from eggs!

### Student 15

Now listen closely and you’ll surely learn more about this fascinating dinosaur!

**\*\* SING TRICERATOPS \*\***

### Student 16

Ankylosaurus is the next dino we’ll see, with a look that was as scary as scary could be!

### Student 17

They lived more than 60 million years ago and had clubs on their tails that could strike a mean blow!

### Student 18

Spikes and horns on their bodies were their claim to fame and “Fused Lizard” was the meaning of their name.

## **\*\* SING ANKYLOSAURUS \*\***

### **Student 19**

Stegosaurus is last, but surely not least, so come! Let us meet this plant-eating beast.

### **Student 20**

As big as a truck and over twelve feet tall, with a brain the size of a little golf ball!

### **Student 21**

Across their backs were two rows of spike-shaped plates, and their fossils can still be found in the United States!

## **\*\* SING STEGOSAURUS \*\***

### **Student 22**

What fun to meet dinosaurs that roamed the earth millions of years before our birth.

### **Student 23**

And though they're now extinct, we are happy to say, you can come dino-soaring with us on another day.

### **Student 24**

And head back in time on our traveling tour to visit these amazing creatures once more!

## **\*\* DINO DANCE \*\***
